PROFESSIONAL SUMMARY

Senior Data Engineer with 7+ years of experience building batch and streaming pipelines across payments, banking, and financial services. Hands-on expertise in Python, SQL, PySpark, BigQuery, and Databricks, including legacy integration modernization, Salesforce connectivity, and governed data pipelines. Delivered reporting, reconciliation, merchant onboarding, and customer-lifecycle analytics with automated deployments and production monitoring.

TECHNICAL SKILLS

Languages & processing: Python, SQL, PySpark, Pandas, Java, Kafka
Cloud & data: GCP (BigQuery, GCS, Cloud Composer, Pub/Sub, Vertex AI); Azure (Databricks, Lakeflow Connect, Unity Catalog, Delta Lake, Data Factory, Synapse); Oracle, PostgreSQL, MySQL, Elasticsearch, MongoDB
Integration & delivery: Salesforce Bulk API, REST APIs, OAuth 2.0, Boomi, DALM, Airflow, Git, Harness CI/CD, Docker, Datadog, OpenTelemetry, Grafana, Kibana, Power BI
AI & applications: LLMs (LLaMA), RAG, vector embeddings, Qdrant, FastAPI, Django

PROFESSIONAL EXPERIENCE

Senior Data Engineer | PayPal
Aug 2024 - Present | *Bengaluru, India*

- Modernized paid-media lead ingestion from Boomi to Python and BigQuery, integrating Meta, LinkedIn, and Google Ads APIs to support automated merchant onboarding and downstream analytics.
- Built Lakeflow Connect ingestion for Salesforce Campaign, CampaignMember, Lead, Opportunity, Account, and Contact data into Unity Catalog-governed Delta tables; joined this with M360 activity and C360 profiles to deliver Net New Active campaign signup and activation analytics.
- Developed Databricks notebooks to identify activated campaign customers and update Salesforce records through Composite API PATCH calls, processing updates in batches of 25 and handling individual response outcomes.
- Orchestrated daily customer and merchant reporting pipelines in Cloud Composer (Airflow) for ADS (Authoritative Data Store) and ADMC (Authoritative Data Mart for Customers), covering profiles, payment histories, and reconciliation.
- Migrated Boomi ETL pipelines to DALM, processing 50M+ records daily; automated Oracle-to-BigQuery migration with GCS-staged loads, partitioning, and concurrent encryption.
- Implemented OAuth 2.0 authentication, cursor-based pagination, and exponential backoff with jitter; transformed nested API JSON payloads into BigQuery datasets.
- Automated containerized deployments through Git-integrated Harness CI/CD in DALM; instrumented jobs with OpenTelemetry and Datadog to detect execution delays and trigger alerts.

Lead Engineer - Development | FIS Global
Oct 2022 - Jul 2024 | *Chennai, India*

- Led event-driven ETL development for core banking on GCP; orchestrated Airflow workflows and ingested Pub/Sub streams into BigQuery, using GCS staging for reconciliation and reporting.
- Directed Oracle-to-PostgreSQL migration with automated SQL conversion; coordinated cross-team delivery, report validation, and end-to-end testing to maintain data integrity.

Senior Executive - Azure Data Engineer | Deloitte
Jan 2021 - Sep 2022 | *Gurugram, India*

- Designed data workflows using Azure Data Factory and Azure Databricks; built Synapse analytical models with T-SQL and deployed a three-node ELK Stack for centralized monitoring.
- Managed delivery through Azure Boards, investigated pipeline failures, enforced data governance standards, and maintained technical documentation.

Software Engineer - Big Data Analytics | Prodapt
Aug 2019 - Oct 2020 | *Chennai, India*

- Built ingestion and transformation pipelines using PySpark and Kafka; automated MySQL reporting and delivered Grafana and Kibana dashboards for operational monitoring.
- Developed a Django and MongoDB e-commerce application with user authentication and role-based access management.

EDUCATION

Bachelor of Technology, Information Technology | Sri Sairam Engineering College, Chennai | May 2019
GPA: 8.74 | Anna University rank: 16
