Education

- **Sri Sairam Engineering College** — Chennai, India
  Bachelor of Technology in Information Technology; GPA: 8.74 — *June 2015 – May 2019*
  Anna University 16th Rank holder - First Class with Distinction

Experience

- **PayPal** — Bengaluru, India
  Senior Data Engineer — *August 2024 – Present*
  - **Data Migration & Pipelines:** Migrated pipelines from **Boomi** to **DALM** handling **50M+ records daily**; automated **Oracle** to **BigQuery** migration with **GCS**-staged loads, partitioning, cross-project queries, and multithreaded **asyncio**-based file encryption/decryption; optimized **Elasticsearch** cluster performance and resolved data consistency issues across nodes and indexes.
  - **Reporting & Extracts:** Built and maintained daily data extract and reporting pipelines for customers and merchants; orchestrated end-to-end workflows on **Cloud Composer (Airflow)** covering customer profiles, payment histories, and reconciliation; ensured SLA adherence across all daily batch runs.
  - **Merchant Onboarding Campaigns:** Designed automated onboarding campaigns for new merchants via paid media ad forms (**Google, LinkedIn, Facebook**); built downstream analytics pipelines and monitored performance through **Datadog** dashboards for real-time observability and alerting.
  - **GenAI & Automation:** Built customer behavior analysis pipelines on transactional data using **LLaMA-based LLMs** and vector embeddings; integrated **Atlassian APIs** into **Open WebUI** to automate **JIRA** ticket creation and updates from **Confluence** pages via a conversational interface, reducing manual overhead.
- **FIS Global** — Chennai, India
  Lead Engineer – Development — *October 2022 – July 2024*
  - Led development of data pipelines and event-driven workflows for core banking systems on **GCP**; orchestrated ETL with **Cloud Composer** DAGs and real-time streaming ingestion via **Pub/Sub** into **BigQuery**; delivered critical reporting, reconciliation, and Fusion data extracts with **GCS** as the staging layer.
  - Directed **Oracle** to **Postgres** migration with automated SQL conversion scripts; led Egen/Igen report testing, cross-team delivery coordination, and contributed to end-to-end project planning and system validation.
- **Deloitte** — Gurugram, India
  Sr. Executive – Azure Data Engineer — *January 2021 – September 2022*
  - Designed and managed end-to-end data workflows using **Azure Databricks**, **Azure Data Factory**, **Synapse Analytics (T-SQL)**, and the ELK stack; developed **REST APIs** in **Java Spring Boot** with **MySQL** and deployed a three-node **ELK cluster** for centralized log monitoring and observability.
  - Led project execution via **Azure Boards**; drove pipeline failure root-cause analysis, enforced data governance standards, and maintained technical documentation throughout the delivery lifecycle.
- **Prodapt** — Chennai, India
  Software Engineer – Big Data Analytics — *August 2019 – October 2020*
  - Built ingestion and transformation pipelines using **PySpark** and **Kafka**; automated **MySQL** reporting scripts; delivered real-time monitoring dashboards in **Grafana** and **Kibana**; developed an e-commerce web app using **Django** and **MongoDB** with user authentication and role management.

Projects

- **Voice-Interactive Bill Splitting System**: Built a **FastAPI** backend with **OpenAI Whisper** for speech-to-text and **RAG with Qdrant** for context-aware split suggestions; developed during the **PayPal AI Hackathon**.

Skills

- **Languages:** Python, PySpark, Java, C++, SQL, Pandas
- **GenAI / ML:** FastAPI, RAG, OpenAI Whisper, LLMs (LLaMA), Qdrant, Vertex AI, spaCy
- **Technologies & Databases:** Kafka, Elasticsearch, BigQuery, MongoDB, Cassandra, ClickHouse, PostgreSQL, Oracle, MySQL, Django, Spring Boot, Docker
- **Tools & Platforms:** Airflow (Cloud Composer), Datadog, Grafana, Kibana, Power BI, ELK Stack, Linux, Maven
- **Cloud:** GCP (BigQuery, GCS, Cloud Composer, Pub/Sub, Vertex AI), Azure (Databricks, Data Factory, Synapse Analytics)
