PROFESSIONAL SUMMARY

Senior Data Engineer with 7+ years of experience building batch and streaming pipelines across payments, banking, and financial services. Hands-on expertise in Python, SQL, PySpark, BigQuery, and Databricks, including legacy integration modernization, Salesforce connectivity, and governed data pipelines. Delivered reporting, reconciliation, merchant onboarding, and customer-lifecycle analytics with automated deployments and production monitoring.

TECHNICAL SKILLS

Languages & processing: Python, SQL, PySpark, Pandas, Kafka
Cloud & Data: GCP (BigQuery, GCS, Cloud Composer, Pub/Sub); Azure (Databricks, Lakeflow Connect, Unity Catalog, Delta Lake, Data Factory, Synapse); Oracle, PostgreSQL, MySQL, Kafka
Integration & Delivery: Salesforce Composite API, REST APIs, DALM, Airflow, Git, Harness CI/CD, Docker, Datadog, Grafana, Kibana, Power BI, Claude Code, Crew AI
Financial Services & Payments: Customer and merchant payments, payment reporting, reconciliation, POS data, banking data, Salesforce CRM

PROFESSIONAL EXPERIENCE

Senior Data Engineer | **PayPal** **Aug 2024 – Present**
Bengaluru, India

- Built and maintained scalable **Databricks ingestion pipelines** from enterprise source systems into **Delta Lake** using **Lakeflow Spark Declarative Pipelines** for incremental and streaming data loads; implemented **Bronze, Silver, and Gold Medallion layers** and published enriched Gold datasets for merchant reports and business aggregates, optimized for performance, scalability, reliability, and cost efficiency.
- Designed paid-media lead ingestion pipeline with **Pyspark and Unity Catalog**, integrating Meta, LinkedIn, and Google Ads APIs to support automated **merchant onboarding** and downstream analytics.
- Orchestrated daily **customer and merchant reporting pipelines** in **Airflow** for ADS (Authoritative Data Store) and ADMC (Authoritative Data Mart for Customers), covering profiles, **payment histories, and reconciliation**.
- Implemented automated **data quality, monitoring, and governance** across Delta tables using schema validation, duplicate and reconciliation checks, required-column constraints to prevent null values, and pipeline-failure alerting; governed datasets centrally through **Unity Catalog** using PII tags, column masking, row-level access policies, RBAC, lineage, and centralized access-log analysis.
- Developed a **CrewAI-based multi-agent workflow** using **GPT models and SerpAPI tools** to enrich and classify customer complaints, perform sentiment analysis, and generate structured insights for complaint prioritization, trend analysis, and downstream reporting.

Lead Engineer – Development | **FIS Global** **Oct 2022 – Jul 2024**
Chennai, India

- Led event-driven ETL development for **core banking** on GCP; orchestrated **Airflow** workflows and ingested **Pub/Sub streams into BigQuery**, using GCS staging for **reconciliation and reporting**.
- Directed **Oracle-to-PostgreSQL migration** with automated SQL conversion; coordinated cross-team delivery, report validation, and end-to-end testing to maintain data integrity.

Senior Executive – Azure Data Engineer | **Deloitte** **Jan 2021 – Sep 2022**
Gurugram, India

- Designed data workflows using **Azure Data Factory and Azure Databricks**; built **Synapse analytical models** with T-SQL and deployed a three-node **ELK Stack** for centralized monitoring.
- Managed delivery through Azure Boards, investigated pipeline failures, **enforced data governance standards**, and maintained technical documentation.

Software Engineer – Big Data Analytics | **Prodapt** **Aug 2019 – Oct 2020**
Chennai, India

- Built ingestion and transformation pipelines using **PySpark and Kafka**; automated **MySQL reporting** and delivered **Grafana and Kibana dashboards** for operational monitoring.
- Developed a Django and MongoDB e-commerce application with user authentication and **role-based access management (RBAC)**.

EDUCATION

Bachelor of Technology, Information Technology | Sri Sairam Engineering College, Chennai | May 2019
GPA: 8.74 | Anna University rank: 16
